

The Big Divide
Genesis 13
Week 3 of 14

According to the Self Storage Association, a trade group charged with monitoring such things, the country now possesses about 1.9 billion square feet of personal storage space outside of the home. All this space is contained in nearly 40,000 facilities owned and operated by more than 2,000 entrepreneurs, including a handful of publicly traded giants like Public Storage, Storage USA, and Shurgard.

According to a recent survey, the owners of 1 out of every 11 homes also own a self-storage space. This represents an increase of 75 percent since 1995. Most operators of self-storage facilities report 90 percent occupancy, with average stints among renters of 15 months. Last year alone saw a 24 percent spike in the number of self-storage units on the market.

But, amazingly, as the amount of storage space required by homeowners has grown, so has the average size of the American house. In fact, the National Association of Homebuilders reports that the average American house grew from 1,660 square feet in 1973 to 2,400 square feet in 2004.

So let's get this straight—houses got bigger, average family sizes got smaller, and yet we still need to tack on almost two billion square feet of extra space to store our stuff? [Tom Vanderbilt, "Americans Are Storing More Stuff than Ever," *Slate.com* (7-18-05)]

Abraham אברהם

The Big Divide

Genesis 13

Week 3 of 14

This week's Daily Bible Reading will consist of scripture passages about possessions.

- DAY ONE – Genesis 13
- DAY TWO – 1 Kings 21
- DAY THREE – Matthew 6:19-24
- DAY FOUR – Luke 12:13-21
- DAY FIVE – Acts 4:32-5:11

Memory Verse:

"If anyone has material possessions and sees his brother in need but has no pity on him, how can the love of God be in him? Dear children, let us not love with words or tongue but with actions and in truth." (1 John 3:17-18)
