

Privileged Planet
Psalm 8
Week 5 of 8

Genesis teaches that the creation of life on earth was a marvelously designed work of God. A recent article in *Time*, which speculates on the possibility of life on other planets, confirms the wonder of life on earth:

Evolutionary biologist Ernst Mayr, for one, considers the likelihood of life of any sort beyond our planet close to zilch. Says he: "The chance that this improbable phenomenon [the creation of life] could have occurred several times is exceedingly small, no matter how many millions of planets in the universe."

Paleontologists Peter Ward and astronomer Donald Brownlee agree. In a provocative new book, *Rare Earth*, they maintain that in most places beyond earth, radiation and heat levels are so high, life-friendly planets so scarce and the cosmic bombardments so severe that the only life-forms that might make it would be bacteria-like critters living deep in the soil. The odds against technologically advanced societies, they argue, are astronomical.

Even Geoff Marcy, the leader in the increasingly successful hunt for planets outside our solar system, feels that "we may well be alone in the universe."

Alone? Not completely alone. Doesn't it all point to a Designer? Our earth's uniqueness is one more reason to believe in the One who created the perfect universe and a unique planet to harbor the crown of his creation. [Frederic Golden, "Will We Meet E.T.?" *Time*, (4/10/00)]

Privileged Planet
Psalm 8
Week 5 of 8

Our daily Bible reading for the week will concentrate on passages that testify to God being the Creator of the earth.

- DAY ONE – Psalm 8:3-4
- DAY TWO – Psalm 135:6-7
- DAY THREE – Genesis 9:16-17
- DAY FOUR – Psalm 148
- DAY FIVE – Proverbs 3:19-20

Memory Verse:

“By wisdom the Lord laid the earth’s foundations, by understanding he set the heavens in place;”
(Proverbs 3:19)
